

Service Line Puller Kits

With a backhoe and the Service Line Puller Kit you can remove old and failing service lines and replace them with new tubing with minimal digging, less property damage, reduced downtime and with less expense than digging the entire service and replacing it.

There are two Service Line Puller Kits available, one for 3/4" and 1" pipe and one for 1 1/4" to 2" pipe. Each kit contains all the parts needed to remove and replace old copper, lead, steel and plastic pipe.

Service Line Puller Kit

Features:

- The Split Bull Head gives greater “push/pull” power with its improved grabbing design.
- Our exclusive Split Bull Head attaches directly to the plain end of the cable, making field repairs simple, should a cable break. If the competitions’ cable breaks you have to buy a new cable because the bull head is attached to it permanently.
- Our kit includes more parts than the competitions’. See the tables to the right to see what’s included.

Benefits:

- Far less digging than conventional methods
- Less damage to private property
- No trench settlement
- Reduces amount of time customer’s service is down
- Pulls old copper, lead, steel and plastic service lines
- Pulls new service line and splits old plastic tubing

3/4"-1" Service Line Puller Kit

DESCRIPTION	SHORT DESC.	PRODUCT NUMBER
3/4"-1" Puller Kit w/50' Cable*	SPK-A	63150
